Instructions for Final Robot

1. Download CSI2234_ATR.zip from the wiki
2. Extract all of the files
3. Click on the CSI2334_ATR file, then the DosBox file
4. Move robot.at2 to the atr210 folder
5. Click on RunATR.bat to launch the simulation
6. In the command prompt, type "ATR2", followed by a space and "robot.at2"
7. Now type a space, and the name of the robot you wish to fight, then hit enter
    - ex. "ATR2 robot.at2 Circles.at2"
    - If you would like to run the fight multiple times, type "/m" and the number of times you want them to fight in between "ATR2" and "robot.at2"
    - ex. "ATR2 /m4 robot.at2 Circles.at2" will make our robot and Circles fight 4 times in a row
8. Press any key to watch the fight
    - You may press the ESC key to end the fight at any time
    - Pressing the 'G' key will toggle the graphics
    - Pressing the 'S' key will toggle sound
9. After the fight, some statistics will appear, and you may press any key to continue to the next screen
10. From here, you will see the stats from the previous fight again, and can go back to step 5 and continue fighting, if you wish
11. When you are done, simply click on the X button in the corner to close the program
